ROAD TO GERMANY INTRODUCES PRIVATE, CUSTOMIZABLE CASTLE AND CAR MUSEUM TOUR

January 28, 2008

TORONTO, Ontario --- Road To Germany, the experts in customized, private tours of Germany, has just added a unique tour of Castles and Car museums in Germany.

As home to the world-famous Autobahn - a road with no speed limits – and some of the world’s best-known auto manufacturers, as well as host to the Formula 1 races, Germany is a choice destination for car aficionados. Road to Germany is pleased to announce a self-drive tour that will take travelers through majestic castles, lovely towns and thrilling experiences in a car of their choosing, which is a great compromise between those who like to go through their vacation full-throttle, and those who prefer to take the scenic route.

For those who love cars and driving, the tour includes car rental with options ranging from the Volkswagen Golf through to the luxury Mercedes S Class, BMW 7 Series or Audi A8. Highlights of the car-lover’s tour include visits to the Volkswagen theme park - “Autostadt” - in Wolfsburg; the people- and experience-oriented “Audi Forum” in Ingolstadt; mushroom-shaped BMW Museum near Munich’s 1972 Olympic village; and the new Porsche Museum and Mercedes Benz Museum – a true gem of modern architecture. Trips can be planned to experience one of the Formula 1 races held yearly in Nürburgring. And of course, an authentic driving tour of Germany and its influence on the automobile would not be complete without a trip on the famous Autobahn - and there are plenty of opportunities to do just that!

For those who prefer to slow down, take in the scenery and escape the fast pace of every day in a charming and welcoming town, this same self-drive tour offers the opportunity to take scenic drives, view some of Germany’s most famous castles and visit cities with an authentic charm that can take one back to simpler days of long ago. For a taste of history, visit Ingolstadt and Bamberg – a UNESCO world heritage site and home of the famous signature “Smokebeer.” Some of the scenic highlights of the tour are the picturesque drive along the “German Toy-Route” through the Thuringian Forest and a visit to Mount Brocken, the highest point in Germany. While the forest drive may awaken fairy tale sentiments, the great castles and other architectural masterpieces on this self-drive tour are sure to fully realize this dream world. Some of the most noteworthy sites include the town of Celle’s famous Ducal Palace, the 700-year-old Wolfsburg Castle, the grand Veste Coburg Citadel, the famous Linderhof Palace, and the fairy tale castle Neuschwanstein. Visitors will even have the opportunity to live the fantasy with a night’s stay in the 5star Fuerstenhof Hotel, which was originally built as a baroque palace in 1670.
